

Setting up MSN Messenger account in ArmorGate's Kopete application

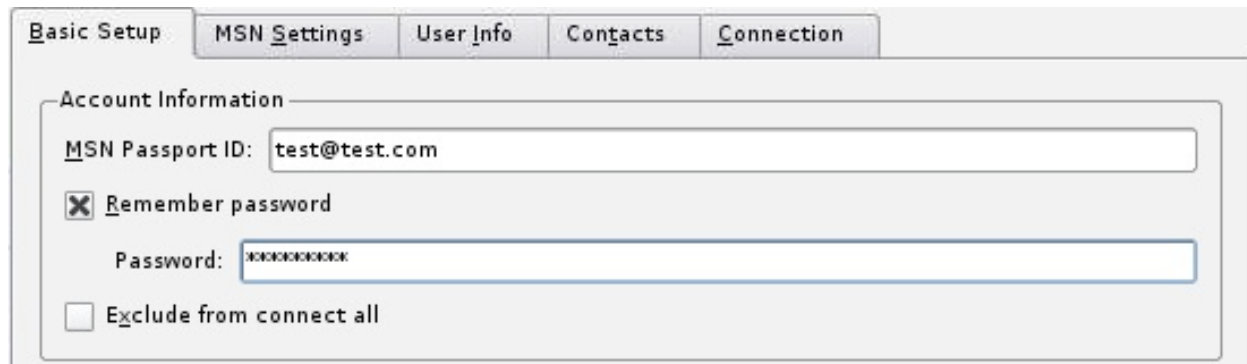

1. Log into your Remote Desktop.
2. Launch Kopete by going to the K Menu -> Internet -> Instant Messenger (Kopete).

3. The first thing you will see will be the *Welcome to the Add Account Wizard*. Select **MSN Messenger** and click on **Next**.

4. Second step is to provide your **MSN Passport ID** in the appropriate box. For your convenience, Kopete can remember your MSN password in a secure way. This way you don't need to enter it every time. If you would like to do that, then simply check **Remember Password** and type in your password in the **Password** field. Click **Next**. Then click **Finish**.

The image shows a screenshot of the MSN Settings dialog box in Kopete. The dialog has five tabs: 'Basic Setup', 'MSN Settings', 'User Info', 'Contacts', and 'Connection'. The 'MSN Settings' tab is currently selected. Inside the dialog, there is a section titled 'Account Information'. This section contains the following elements: a text input field labeled 'MSN Passport ID:' with the value 'test@test.com'; a checkbox labeled 'Remember password' which is checked; a password input field labeled 'Password:' with masked characters; and a checkbox labeled 'Exclude from connect all' which is unchecked.

5. At this point, you will see the KDE Wallet Service box. KDE Wallet is the program that keeps all your passwords and sensitive information secure. In order to use it, you need to come up with a password, that will let you access that information. This password will be needed anytime you want to access your KDE Wallet (such as storing new passwords for other applications). Make sure that the password is not too easy (otherwise someone might guess it), or too hard (you might forget it yourself).

Please type in your in the Password field and type in same password in the Verify field. The password strength meter on the bottom will show the “strength” of your password. Ultimately you want the strength meter to reach to all the way to the right.

When you are done type in your password, click on Open.

You are done! Enjoy your secure MSN Messenger service.
